

# TropEco Sustainability Interns Information Sheet

Passionate about sustainability? Got a great idea for a project? Want to get ahead in your career? Become a TropEco Sustainability Intern and actively contribute to a brighter future while learning valuable skills and knowledge from our award-winning team.

JCU's TropEco Sustainability Intern program is a great opportunity for students to participate in activities that will provide them with valuable work experience, including formal recognition of their involvement. Interns are also eligible to enter the annual TropEco Awards.

Examples of activities our interns are involved in, or help deliver, include:

- Developing interpretive signage for our flora and fauna on campus
- Conducting building audits for energy and water use
- Developing GIS maps for significant tree species on campus
- Researching the development of sustainable communities at JCU
- Communications and marketing for the TropEco program
- Organising movie nights, art exhibitions, or guest lectures
- Participating in sustainability campaigns
- Writing relevant articles for TropEco News
- Photography for events and activities
- Helping develop community garden sites on campus
- Helping implement sustainable transport programs on campus
- Assisting the Bicycle Users Group (BUG) with programs and activities.

To be considered for the TropEco Sustainability Intern program you'll need to:

- Participate in at least two professional development activities
- Contribute a minimum of 10 hours over the course of your degree
- Help deliver at least one sustainability event/activity on campus.

Download an application form from our website.

Our award-winning TropEco program celebrates Sustainability in Action by creating opportunities and recognition for your sustainability ideas. TropEco is all of us creating a culture of sustainability at JCU.
