accepting
abstracts**

9am – 3:30pm, followed by social event

Tuesday 22nd November 2016

Level 4, UQ Oral Health Centre

Cnr Bramston Tce and Herston Rd, Herston

QUEENSLAND CARDIOVASCULAR RESEARCH NETWORK

*Fostering a visionary, vital and connected cardiovascular
research community in Queensland.*

- Keynote speakers include Professor John Fraser and Professor Michael Good

The Queensland Cardiovascular Research Network (QCVRN) is hosting the first Cardiovascular Research Showcase and invites researchers, students, policy makers, clinicians and health professionals to contribute to a full day program that will provide a comprehensive overview of current cardiovascular research activity in Queensland.

The showcase will promote Queensland research across the spectrum of cardiovascular disease, including causes and mechanisms, diagnosis, prevention, treatment and management. The showcase will also provide the chance to share information about research opportunities and foster collaboration.

The QCVRN is now accepting abstracts for short presentations and posters focussing on basic science and clinical research, public health research, cross-discipline collaboration, or translating research into policy and practice.

Awards given for best presentation and best poster.

More information

Abstracts and enquiries to qcvrn@heartfoundation.org.au

Abstracts due Friday 30th September.

Presenters advised by Friday 14th October.
