Evidence-based orthodontics

Develop a better understanding of diagnosis and comprehensive orthodontic treatment options related to Open bite, Class II and asymmetric malocclusions.

All the lectures are based on scientific evidence obtained during several years of academic research and clinical work. All the lectures are based on scientific evidence obtained during several years of academic research and clinical work. Professor Guilherme Janson will share with you the results from his life-time research work published in peer-reviewed orthodontic journals.

Interact with Professor Janson and clear all your doubts at JCU's Annual Clinical weekend.

The weekend makes up for 10 CPD Points.

DETAILS

Friday, 29th May, 12.30 pm - 5.30 pm

Saturday, 30th May, 9 am - 5.30 pm

The seminar will take place in the D3.054, The Cairns Institute, JCU Cairns, Smithfield.

Early bird registration, \$1,200 + GST, Registration \$1,500 + GST

Annual Clinical Weekend: Evidence-based Orthodontics - Overview

COURSE OUTLINE

Professor Guilherme Janson will present the results from his life-time research work published in peer-reviewed orthodontic journals.

LEARNING OUTCOMES

You will learn how to make a differential diagnosis of the Class II and III subdivision malocclusion types and determine the best treatment alternatives for them.

You will also know the advantages of asymmetric extractions and their influence on the cant of the occlusal plane and on the smile esthetics.

You will understand the clinical stability expected when treating open bites in the deciduous, mixed and permanent dentitions with several treatment approaches. Several treatment options will be discussed, emphasis will be put on improving long-term stability with different clinical strategies.

You will learn which Class II malocclusion treatment protocol is more efficient compared to others, and why. In addition, you will know how to increase treatment stability in the different treatment alternatives. More importantly, you will learn the short and long-term effects of each therapy on the facial profile.

All the lectures are based on scientific evidence obtained during several years of academic/clinical work.

ABOUT THE PRESENTER

PROFESSOR GUILHERME JANSON

Professor of the Department of Orthodontics at Bauru Dental School – University of São Paulo.

Visiting Research Fellow in the Orthodontic Department at the Faculty of Dentistry – University of Toronto.

Diplomate of the Brazilian Board of Orthodontics.

Vice-Dean of Bauru Dental School – University of São Paulo.

Deputy Interim Superintendent of the Hospital for Rehabilitation of Craniofacial Anomalies – University of São Paulo.

Prof. Janson has published more than 450 articles in Orthodontic Journals and is looking forward to answering specific orthodontic questions relating to issues you experience in your practice.

DAY 1 - A SYSTEMATIC APPROACH TO DIAGNOSIS AND TREATMENT OF ASYMMETRIC MALOCCLUSIONS

12.30 – 1 pm	Registration
1 – 1.30 pm	Canapes, Tea & Coffee
1.30 – 3 pm	A systematic approach to diagnosis and treatment Class II subdivision malocclusions
3 – 3.30 pm	Afternoon Tea
3.30 – 5 pm	A systematic approach to diagnosis and treatment Class III subdivision malocclusions
5 – 5.30 pm	Q&A

DAY 2 - EVIDENCE- BASED ORTHODONTICS IN THE TREATMENT OF OPEN BITE AND CLASS II MALOCCLUSIONS

9 – 10.30 am	Treatment and stability of anterior open bite - Part 1
10.30 – 11 am	Morning Tea
11 – 12.30 pm	Treatment and stability of anterior open bite - Part 2
12.30 – 1.30 pm	Lunch
1.30 – 3 pm	Efficiency of the different protocols for Class II malocclusion treatment -Part 1
3 – 3.30 pm	Afternoon Tea
3.30 – 5 pm	Efficiency of the different protocols for Class II malocclusion treatment - Part 2
5 – 5.30 pm	Q&A
