CISCO PROXIMITY PAIRING

With proximity pairing you share a presentation wirelessly from your BYOD (laptop, tablet and smart-phone) through the video conference hardware system (codec).

Available in

Proximity Pairing is available in these centrally bookable rooms:

- SX10 (004-255, 034-101, D1-022C)
- SX20 (142-233, 142-234, 301-007, E5-101)
- Webex Room Kit Mini (A1-229B)

Proximity Pairing/Sharing

Connect BYOD (laptop, tablet and smart phone) wirelessly to the AV system.

➤ Pair laptop

1. Download and install the **Proximity** software for PC or Mac from (proximity.cisco.com)
 - a. Win: Run the Cisco Proximity on the laptop (shortcut Alt+F12)
 - b. Mac: Run the Cisco Proximity and click the **Share link** on the Proximity popup window
2. The laptop screen is mirrored on the room display system.

➤ Pair tablet or smart phone

1. Download and launch Cisco **Proximity app** from Google play/App store
2. Ensure you are connected to Eduroam (WiFi)
3. The app detects the video conference unit and pairs automatically with it
4. Touch 'Share Screen' to share content from your device
