

AV Equipment Guide

Connecting from JCU to an external system

IP Connection

Dial the IP address (for example 125.12.89.23) supplied by the external site

Dial the E.164 Alias URI dialling (for example 12345678@une.edu.au) supplied by the external site

Note: If the External site is behind a firewall, then they must ensure permissions have been set to allow H.323 traffic to/from their system and IP address 202.6.115.29

ISDN Connection

Note: Telstra line charges will be charged to the site initiating the connection i.e. extra charges will be charged to JCU is JCU initiates the call.

Video calls

The ISDN videoconference call to connect to looks exactly like a telephone number, for example 0212345678. The number must be preceded by the required prefix – contact VAVS to obtain the prefix.

Telephone calls

To connect a phone call from a JCU videoconference system also requires a prefix. Contact VAVS to obtain the prefix.
