## Learning Glass - Cleaning.

1. If your writing is still wet then you can simply wipe it off with the paper towel provided in the room.

2. If, however your writing has dried you will then need to use either the **baby wipes** or **cleaning spray** provided in room to wet the ink and then wipe off with paper towel.
3. **Note:** When your ink is dry, it only requires a small amount of moisture to permit easy cleaning with paper towel. We suggest using a small number of baby wipes to go over your writing and then paper towel to clean. If you wish to use the spray, spray a small amount onto some paper towel then wipe your writing. Now use fresh dry paper towel to clean.

The Learning Glass may appear dirty to the naked eye in room, however on camera it may not, so always check the TV in room post cleaning.

**Note:** Always leave the LG clean when you are finished using it.
