PHARMACY – CAREER SNAPSHOT

Fast Facts source: JobOutlook (11/18)

As of 30 June 2017 there were circa 30,000 pharmacists registered with Pharmacy Board which comprises approximately 4.5% of all health practitioners registered in Australia recording 2.2% growth over previous year¹. The scene of over 5700 pharmacies, is dominated by the household national franchises who have 25% share of the overall store numbers but 50% of the total value of the industry². In the coming years pharmacies will be expected to take on a growing advisory in addition to the dispensary role as part of the government’s drive to shift services and costs away from hospitals³. The pharmacy business may also be influenced by the “seismic shifts” affecting the drug making industry: the push of governments and insurers to reduce price; to base the price paid on the measurable health outcomes rather than numbers of drug units sold (VBP Value Based Pricing). The payers are also pushing for change from ongoing treatment to prevention, diagnostics and cure⁴. A comprehensive overview of the Pharmacy industry in Australia is available on IBISWorld (to access the full report log in through the JCU Library, LibGuides page).

Career options for pharmacists

While up to 75% of JCU Pharmacy students choose to work in community pharmacies, this course prepares you for a broad range of other exciting careers:

- Hospital pharmacy
- Complex Care Coordinator
- Consultant pharmacy
- Drug Development with start-ups or pharmaceutical companies
- Drug clinical trials
- Regulatory affairs
- Drug Safety Officer
- Life sciences researcher at research institutes: CSIRO
- Entrepreneur in healthcare
- Academic research and teaching
- Health policy with various levels of government and Non-Govt. Organisations
- Management consulting for health- and pharma industry
- Pharmacist professional organisations
- Science communications
- Medical writing

For more information consult the Pharmacy Careers Guide compiled by the Pharmaceutical Society of Australia.

To practice as a Pharmacist in Australia you must be registered with the Pharmacy Board of Australia and keep meeting the obligations of the profession.

Employability skills and workplace experience

Your course will equip you with the professional knowledge, skills and professional placement opportunities to help you meet the requirements of registration as a pharmacist. However depending on the type of work you are thinking of, there are many experiences you can seek parallel to your course to prepare yourself for your career.

For example if you are thinking of becoming a community pharmacist you might like to start with participating in JCU’s award winning Student Mentor Program where you will develop evidence of caring behaviour and the type of communication skills that are relevant to your future profession. You could take it a step further by competing for the Pharmacy Student of the Year (PSOTY). To develop your commercial awareness you could participate in the National Student Business Plan Competition. To gain a better understanding of the healthcare environment and learn how to interact with patients in a healthcare setting, you could join the ranks of volunteers with the Townsville Hospital.

For networking, public speaking, project management or leadership skills you may like to consider joining and taking up administrative functions in JCU Student Association’s student clubs of interest eg. Pharmacy Students Association or Molecular and Cell Biology Student Association or the National Australian Pharmacy Students’ Association.

If you have business interests that may take you to work in the pharma industry sector and you wish to develop the all – important interdisciplinary collaboration skills, look for industry competitions and other student challenges and competitions, team up with students from another science,
business, IT or medicine major and pitch your idea at EY Survive the Panel (where you can win $20,000 to make your idea happen) or offer your knowledge through 160 Degrees Consulting where you can show your flair for innovation and make yourself known within the industries. Innovation North Queensland (INQ) in Townsville runs a Startup Onramp – a training and mentoring program for first time startup founders and Women in Rural Regional and Remote Enterprises (WIRE) program offers Virtual Business Women Bootcamp and other support. For more information on Life Sciences entrepreneurship access MedTech and Pharma Growth Centre’s (MTPConnect) website.

Studying and volunteering overseas and attending careers fairs are effective ways to develop professional networks and your understanding of the global labour market particularly if you are open to considering a career in areas other than community pharmacy.

Identifying Opportunities

Working as a casual or part time pharmacy assistant is a good way to gain employability skills and industry experience, which may help with some aspects of your degree. Many employers use this as a way to observe you as a possible future employee. Start early researching jobs and bookmarking established companies and life science startups of interest for internships, graduate programs and junior pharmacy jobs through the following websites:

- JCU Careerhub
- Queensland Govt Smart Jobs
- Pharmaceutical Society of Australia Job Board
- SHPA Job Board
- Therapeutic Goods Administration Recruitment
- Pharmaceutical Society of Australia Intern Program
- Seek vacancies
- GradSchool
- GradConnection
- GradAustralia
- Graduate Opportunities
- Queensland Government Graduate Portal
- Australian Job Search
- Australian Public Service
- Defence Jobs
- LocumCo
- Life Sciences QLD Directory
- AusBiotech Directories
- BioMelbourne Directory
- BioPharmGuy: Directory
- MedicalStartups: Directory
- AngelList: Healthcare Startups

Job and internship opportunities are frequently posted on employer websites (e.g., AstraZeneca, Takeda, GSK, Pfizer, Johnson&Johnson, Sanofi, Novartis), LinkedIn, Facebook pages, twitter feeds, via your College emails and Facebook posts.

Graduate Positions vs Graduate Programs

Large pharmaceutical companies recruit graduates usually once a year for a structured training program. Tap into Glassdoor and Whirlpool Forum to find out about the recruitment processes.

Smaller organisations including startups may have openings at any stage and may also be responsive to “speculative applications” (sending in a CV and cover letter that shows how well your interests, skills, experience and knowledge fit with the company’s agenda and values).

Professional Associations

You can demonstrate your commitment to the profession, enrich your education (through conferences, PD and career development courses) and enhance your job search through networking events within a free or discounted student membership of a professional organisation:

- JCU Pharmacy Students Association
- National Australian Pharmacy Students Association
- International Pharmaceutical Students Association
- Pharmaceutical Society of Australia
- Professional Pharmacists Australia
- Society of Hospital Pharmacists of Australia (SHPA)
- Australian Association of Consultant Pharmacist
- Pharmacy Guild of Australia
- Australian Pharmacy Council
- Pharmacy Board of Australia
- Medicines Australia
- Generic and Biosimilar Medicines Association
- Association of Regulatory and Clinical Scientists to the Australian Pharmaceutical Industry
- Australian Pharmaceutical Professionals Australia
- Therapeutic Goods Administration
