

Marine Radio Licensing

WHS-PRO-INFO-016a

This Information Sheet provides information about marine radio licensing requirements.

JCU Mandatory Marine Radio Licensing Requirement

As of 1st January 2019, JCU boating operators (master of a vessel) must hold a marine radio license as part of the minimum qualifications to operate a JCU vessel.

At a minimum, all boat operators are required to hold a Short Range Operators Certificate of Proficiency (SROCP), commonly known as a VHF Radio Operators Certificate.

How to Obtain a Marine Radio License

There are numerous options including on-line courses and face-to-face training of varied cost and qualification level. The minimum requirement for operating JCU vessels is currently the Short Range Operators Certificate of Proficiency (SROCP).

To complete this qualification, it is possible to read the Marine VHF Radio Operators Handbook and then complete a theory and practical exam using a local invigilator. The JCU Boating & Diving Office in Townsville carries a limited number of Marine VHF Radio Operators Handbooks, which are available for short-term loan while studying.

Local Courses Available:

The Navigation Centre (Townsville)

<http://www.thenavigationcentre.com.au/>

Phone: 07 4772 1069

Email: shop@thenavigationcentre.com.au

Short Range Operators Certificate of Proficiency (SROCP)

Allow 45 minutes for the 25 multiple choice question exam & practical test.

Exam sitting times are Monday to Saturday 10am to 2pm.

Marine VHF Radio Operators Handbook \$30.00.

Exam & sitting fee approximately \$110.00.

Phone: 1300 308 233 NB: Not online, 2 days Campus Classroom, face-to-face - cost \$290. Revision questions available at:

<http://academic.amc.edu.au/~omc/RevisionQuestionSROCP.html>

If you are considering obtaining commercial vessel operator qualifications, such as Coxswain or Master Class tickets, completing the Long Range Operators Certificate of Proficiency (LROCP) or higher, may be more useful for such commercial applications. Discuss with course coordinator.

Exemptions

A JCU boat operator may be exempt from holding this certificate if there is another approved JCU student or staff member on board who holds this qualification. Unless the vessel is moored and not being used as a work platform, both the vessel master and radio operator must remain with the vessel and must not partake in other duties such as diving or snorkelling. Acting as a Diver's Attendant or Dive Supervisor is allowed.

Exemptions also apply in locations where VHF is not an effective form of communication (e.g. inland waters). Alternative communication devices must be identified using an individual trip risk assessment.
