

Campus Update for Students

The health, safety and wellbeing of our students remains a key priority for us, as well as compliance with the Queensland Government's Health Directions, distancing and hygiene requirements.

Further information can be found on the JCU COVID [website](#).

TP1 return to essential activities

Step 1 - Return to campus for identified subjects requiring face-to-face on-campus learning and teaching activities within a laboratory setting. These subjects have been deemed essential and critical to progression at this time. Sessions will continue across June-July, and into TP2.

TP1 Exams

Step 2 - Final assessment and examinations are occurring through to 19 June.

Social distancing rules are still in place so the expectation is that most students will take their online exams at home. However, for those that are unable to do this, there are limited places available on campus for students to sit their exams. There will be no technical or academic support provided in these spaces. Support will be identical to students sitting exams online at home.

Best wishes in finalising your assessment and exams.

TP2 Plans

Step 3 - Given universities are still required to maintain *social distancing requirements*, TP2 will provide a hybrid delivery return to campus model. *Lectures will be online and recorded* in TP2 which includes study periods 2, 7, 8, 9, 10 and 11. Based on student feedback for enhanced learning and teaching:

- * A weekly interactive [same room, same time] activity will be scheduled either face-to-face or online.
- * Tutorials, workshops, and laboratory sessions emphasising experiential learning have been scheduled on-campus and may extend beyond usual day hours.
- * SP2, 7 and 8 subject attendance details will be communicated to you before 19 June 2020. The timetable is to be released on 7 July 2020 and class registration to open up soon after.
- * Placement and fieldwork plans are underway - please contact your Placement Coordinator/WIL Team.
- * Students unable to return to face-to-face activities by the scheduled commencement date are to contact Course Coordinators to discuss plans. See list in FAQs.
- * On-campus activities will have strict cleaning and hygiene protocols. Attendance records are essential for tracing if/where a COVID-19 case arises.

Our planning will continue to be responsive to changing regulations.

Support is available: We are committed to ensuring that your studies are completed successfully and on time, whilst protecting your health and wellbeing. If you need support please access the options available through the [Student Success Support Package](#).
