

Night Diving Procedures

In addition to normal low risk dive procedures the following procedures shall be followed for night diving:

1. The dive site should be marked prior to the night dive;
2. The site entry and exit points shall be marked with an activated light source;
3. Divers must be experienced in night diving unless participating in a sanctioned training exercise;
4. All divers shall have an activated cyalumes (or other suitable light source) attached in a prominent position to their equipment;
5. Divers must carry a working underwater torch and a backup light/torch;
6. A minimum of two surface personnel must be present.
7. Boats need to call OIRS staff on the radio reporting way in and way out.
