

PhD CAREER SNAPSHOT

Career Pathway Links

The knowledge and service economies have driven huge growth in research job opportunities in recent years. There is a significant demand within the private and public sectors for people with deep knowledge, strong research and analytical skills and innovative capabilities.

As academic research careers are competitive, PhD candidates are encouraged to explore opportunities within and beyond academia to optimise their career outcomes. Many PhD graduates have utilised the knowledge, skills and capacities developed during their doctoral studies to create successful careers as high-level knowledge workers in higher education administration, government, non-government organisations, not for profits and private industry.

The goal of this resource is to provide links to information specific to PhD candidates to help you develop your career management skills and identify pathways to a satisfying and rewarding career.

Reviewing [LinkedIn](#), [Google Scholar](#), [ORCID](#) and [JCU Research Portfolio](#) profiles will provide you with further ideas, inspiration and networks.

[JCU Careers and Employability](#) provides career support to JCU undergraduate and postgraduate students. Please visit all sections of our website to identify the resources and services we provide.

Resume Templates

- [JCU Higher Degree by Research Resume template](#)
- [JCU Postgraduate Resume template](#)
- [Creating Effective CVs as a Researcher](#)
- [How to Write a Resume](#)

Career Information and Planning

[Vitae Realizing the Potential of Researchers](#) – a not for profit UK site providing professional and career development support to researchers. including information on career management and career destinations of doctorate holders. Resources include:

- Career management
