DEGREE Master of Science MAJOR Global Change Biology (GCB)

NAME _____ STUDENT NUMBER _____

Course information – Master of Science

The Master of Science degree is structured such that students take sets of foundational '*knowledge*' specific to their major, technical and / or analytical '*skills*' subjects, *elective* subjects.

Use this document to plan out what subjects you will take and when. Consult with your course advisor about the nature of subjects, research and internship pathways and any queries you may have. The course advisor for each major in the Master of Science programs is listed here. When you are ready to enrol in subjects proceed to your eStudent account.

For more information relevant to the degree see the JCU Course handbook for the Master of Science.

Students wishing to take a semester long internship or research project need to transfer to the Master of Science (Professional) degree. This should be done before you start your course.

Global Change Biology major structure

1. Take the following 4 **Knowledge** subjects:
   1.1. BZ5755 Climate Change and Biodiversity (SP7)
   1.2. BZ5930 Conservation in a Changing World: Issues and Solutions (SP2)
   1.3. BZ5935 Terrestrial Ecophysiology (SP2)
   1.4. BZ5940 Evolutionary Adaption in a Changing World (from 2023)

2. Take these **Skills** subjects:
   2.1. SC5200 Professional Employability (SP1 OR SP2)
   AND
   2.2. SC5502 Design and Analyses in Ecological Studies (SP2)

   AND take 1 of these advanced skill subjects (Major Core Option):
   2.3. BS5260 Modelling Ecological Dynamics (SP1)
   2.4. BZ5450 Ecological and Conservation Genetics (SP2)
   2.5. EV5110 Environmental and Social Impact Assessment (SP2)
   2.6. EV5502 Advanced Geographic Information Systems (SP11)
   2.7. EV5506 Remote Sensing (SP9)

   AND take 1 additional skill subject from **List 1**
   - *For your major we recommend SC5202 Quantitative Methods in Science OR BZ5990 Toolkit for the Field Biologist.*

3. Take 4 **Elective** subjects
See recommendations for your major below.

Descriptions and availabilities of all subjects can be found online using the *Subject Search* tool. Use this to explore your subject options. Each subject is usually only offered once per year, in the 'study period' stated on Subject Search. It is generally recommended to take 8 subjects per year, with 3 or 4 in each main semester (Study Period 1 and 2), and additional subjects in the block mode (intensive) periods (SP3, SP7, SP10 /11) as necessary. An explanation to JCU's academic calendar can be found here.

Multiple subjects can be taken consecutively in a block mode period as long as the face-to-face teaching dates do not overlap. These dates are displayed on the Subject Search tool. For example in SP11 (November) a student can take both EV5502 and EA5640.

Please note that availability of some subjects sometimes changes. While such changes are rare, students should check when a subject is being taught using the Subject Search tool above.

For any subject you need to have fulfilled the 'Assumed Knowledge' and / or Pre-requisites before you take them. These are listed in the subject's description. For example, EV5502 assumes you have already taken EV5505 or an equivalent at JCU or at your previous university. Speak with your course advisor for more assistance on this.

Where a subject includes overnight field trips this is noted in the subject's description on *Subject Search*. Additional fees apply to cover trip transport, accommodation and food expenses for these field trips.
