

What can I do with a Medical degree?

Apply your enquiring mind and knowledge of the human body to combat disease, improve treatment methods and restore people to good health.

Specialist options

You'll need to complete further study with practical experience after you finish your bachelor degree to become a medical specialist. These roles include:

- Anaesthetist
- Cardiologist
- Dermatologist
- General Practitioner
- Neurologist
- Obstetrician/Gynaecologist
- Paediatrician
- Pathologist
- Surgeon.

Did you know

- Barber surgeons were the medical practitioners of the Middle Ages, responsible for bloodletting, amputation and pulling teeth, along with cutting beards and hair.
en.wikipedia.org/wiki/barber_surgeon

Honour board

- Graeme Clark pioneered the multiple-channel cochlear implant, also called the bionic ear.
- Fiona Wood invented spray-on skin which greatly reduces permanent scarring in burns victims.

Perks of the job

- Choose from many specialities
- Enjoy great job security
- Gain excellent earning potential
- Delve into medical research.

- Mathematical Methods (Units 3/4,C) - required
- Chemistry (Units 3/4,C) - required

This course requires a QTAC application, a further written application to JCU and an interview. Check the Medicine course page on the JCU website for details.

Prerequisites apply to commencements from 2024

“ I was always interested in rural medicine and I have been keen on studying tropical medicine and JCU offered both. The programme was a perfect fit for me. When I looked at JCU Medicine's placement program I was impressed as it gives us ample opportunities to gain hands-on experience and prepares us well for the future. ”

Aneasha Ghosh

BACHELOR OF MEDICINE, BACHELOR OF SURGERY
